Script-Controlled ACL – Restrict Record Access Based on Field Value

PHASE 6 – PROJECT TESTING

Testing Objective

Verify that the configured ACLs correctly enforce the required permissions.

Test Cases

TC01 – Admin / Read / All records accessible.
TC02 – bb1 / Read / Authorized EEE records accessible.
TC03 – No role / Read / Access denied.
TC04 – bb1 + bb2 / Create / Create permission available.
TC05 – bb1 + bb2 + bb3 / Write / Edit permission available.
TC06 – bb1 + bb2 + bb3 + bb4 / Delete / Delete permission available.

READ Testing

Impersonate the EEE user and open the Institution Details list to verify the configured READ access.

CREATE Testing

Test the Create operation using a user with the bb2 role.

WRITE Testing

Test record modification using a user with the bb3 role.

DELETE Testing

Test record deletion using a user with the bb4 role.

Administrator Testing

Verify that the administrator retains full access.

Test Result

The ACL configuration demonstrates role-based control over READ, CREATE, WRITE, and DELETE operations.
