Script-Controlled ACL – Restrict Record Access Based on Field Value

PHASE 8 – PROJECT DEMONSTRATION

Project Introduction

Project: Script-Controlled ACL – Restrict Record Access Based on Field Value.
The project demonstrates secure record-level access control using ServiceNow ACLs.

Purpose

Prevent unauthorized users from accessing or modifying restricted records.

Demonstration Flow

1. Login to ServiceNow
2. Show Users and Roles
3. Show Custom Table
4. Show ECE/EEE/CSE Records
5. Demonstrate READ ACL
6. Demonstrate CREATE ACL
7. Demonstrate WRITE ACL
8. Demonstrate DELETE ACL
9. Demonstrate Administrator Access

Final Output

The final system demonstrates controlled access to ServiceNow records based on user roles and configured ACL rules.

Project Benefits

Improved record security, controlled user permissions, reduced unauthorized access, role-based authorization, and secure data management.

Conclusion

The project successfully demonstrates how Script-Controlled ACLs can be implemented in ServiceNow to control record access and operations based on user roles and configured security rules.
